TextHelp Read & Write

Features:

TextHelp Read and Write is a software package that provides a floating toolbar to support writing and literacy skills for students with dyslexia and other literacy difficulties.

It contains all the features including:

- Speech feedback,
- Word prediction,
- Phonetic spell checker,
- Talking dictionary and talking calculator.
- Convert scanned paper documents into word files that can be read aloud and edited
- Capture text or images (with their sources) from any application including the Internet.
- Convert text into audio files for use on portable audio devices such as MP3 players or some mobile phones.
- PDF Aloud, which facilitates speech with highlighting in PDF files.

How to get access to the software:

This software is available for students of Colaiste Ide. Please contact supports in the Study Skills Centre.
